ELECTORAL PROCESS EDUCATION CORP.

MVP SUBSCRIBERS' PAGE

OVERVIEW, HOW-TOS, AND WHAT-FORS

EPEC-MVP Value-Added Analyses and Datasets Help Answer...

...Understand registration validation checks?

...how my qualified organization can acquire value-added analysis products to understand and promote voting processes?

...Better Understand Absentee Ballot Statuses?

...Track Daily Absentee List (DAL) categories in graphs and see analysis of how ballots are tracked?

...Know Who Has/Has Not Returned a Ballot?

...take action with my findings?

...Check for possible duplicate voter IDs?

Overview: MVP Subscription of EPEC Analysis

- EPEC's 501 c(3) mission is to educate the public about election technology and encourage participation in the electoral Process.
- As a non-partisan charity, EPEC greatly appreciates your interest in working with the unique IP we have created to help you understand the election process and promote voter participation.
- Your purchase helps us maintain that capability.

GENERAL OVERVIEW: MVP

1. ELECT provides the data in a CSV file.

2. EPEC has parsed this data into smaller CSV files separated by **Locality, Congressional District, State House District, State Senate District, and City.**

3. EPEC augments the data provided from ELECT with additional value-added intellectual property in order to aid in further analysis (described in full in the “README” files in all directories).

3. An MVP subscription enables you to access data analysis for a LOCALITY or by LOCALITY, with similar analyses for State House and State Senate Districts.

4. This value-added content is supplied as additional fields that are not normally present in the direct ELECT downloads. It is only for groups or organizations qualified to receive election data.

5. The unique analysis is provided in an encrypted, password-protected link after you have filled out the intake and attestation forms.

Full README Explanatory Files are in All MVP Directories

- EPEC is a nonpartisan, 501 c(3) nonprofit charity focused on voter participation and education and, like you, is qualified to receive voter data.
- The unique calculations and analyses that EPEC MVP provides includes Personally Identifiable Information (PII) about registrants and voters.
- **A Non-Disclosure Agreement (NDA) is required to ensure the datasets are protected under our privacy obligations as organizations qualified to receive data for distinct election purposes. The NDA can be signed and uploaded in the Intake Form.**
- The MVP Subscription analysis folders also provide unique summary data on process, and to help you understand the election process over time.

MVP Analysis Files are Downloaded to Qualified User's Computer

File Station

--File management and maintaining files in a secure fashion are key.

--We recommend clearing out the "download" queue on your computer once the files have been saved to a secure location.

EPEC DATA FOR VOTERS
ELECTORAL PROCESS EDUCATION CORP.

1. DAL = CSV/Excel value-added analysis to show process and completion rates

2. Disaffected Voters = voted VA primary, not general election (2022)

3. Quick Look = String Distance Calculations (checks for potentially duplicate voter IDs)

4. RVL_No-National = Comparison to National Change of Address (NCOA) database

5. RVL_Potential-name-change = RVL calculations checking for potential name-change clone pairs

6. RVL_Undefined/Protected = sorting for undefined protected status registrations

7. StringDist = String Distance full calculations

8. StringDistSummaries = Summary calculations checking for possible duplicates or multiple registrations

9. TrueNCOA = Comparisons of RVL with TrueNCOA database

10. EPEC Data Package Readme.txt = All Calculations explained

Other Summary Analysis: By Mail Subprocess – Normal vs UOCAVA Voters
