DEPARTMENT of ELECTIONS

ELECT-633 Voting Systems L&A Testing Certification

Before You Start

This survey replaces the paper version of ELECT-633/SBE-633. Please do not mail, fax, or email these forms to the Department as they will not be accepted.

The survey cannot be saved; once you start, if you time out or close before submitting, you will have to start over.

Note: While following Va. Code §§ [24.2-632](#) and [24.2-633](#), localities should keep records of their Logic and Accuracy (L&A) testing, to include, checklists, steps, and procedures. For L&A, localities should use best practices, like EAC's L&A practices, published [here](#). Example L&A checklists for voting system and EPB can also be found in the ESEC 101 (Voting Systems Security Standards) training, provided by ELECT, found [here](#).

Certification

This L&A testing certification applies to: *

- Only AB in-person voting systems
- Only Election Day voting systems
- Both in-person AB and Election Day voting systems

I, the undersigned, certify to the Department of Elections that:

- I personally witnessed the final testing of the voting equipment (i.e. optical/digital scanners, ADA/BMD devices and Ballot on Demand (BOD) systems, where applicable) used in each precinct;
- The equipment was properly programmed for this election; and

- The testing and programming was conducted as required by Va. Code §§ [24.2-632](#) and [24.2-633](#).
