

Accessing ELECT's Learning Management System (LMS)

When ELECT training creates new user accounts, users will receive an email from the system containing a username and a link to create a unique password. This link is active for 7 days. Individuals can find a short video describing this process here - [REDACTED]

Note: If you are unable to create your unique password within that time, you will need to contact ELECT training staff at training@elections.virginia.gov and request a 'reset password' email. The 'reset password' email will contain a link that will only be active for 24 hours and must be used within that time frame.

You can access ELECT's LMS system at this link – elect.myabsorb.com.

You can watch a short video which describes navigation features in the LMS at this link - [ELECT LMS Introductory Video](#).

Courses currently available to general registrars and electoral board members in the LMS include:

- Risk-Limiting Audits Curriculum
 - Batch-Comparison Method
 - Ballot-Polling Method
- Legislative Changes/Updates Webinar
