DATA BRIEF

VA Midterm Election Observer Placement Priorities

Virginia 2026 General Election — 1 November, 2026 Daily Absentee List Analysis

Priority ranking of localities and precincts for limited observer resources

By Rick Naigle, Senior Process Engineer / Analyst
Edited by Erin Marie Joyce, Communications/ Operations · *1 November 2026*

Bottom Line Up Front

The Department of Justice is sending observers to polling sites across the Commonwealth for the General Election on Tues., Nov. 3rd, including Fairfax County, Prince William County, Charlottesville, and other localities.

Electoral Process Education Corporation (EPEC) has analyzed ballot-processing rates of all Virginia localities during early voting. We have identified areas where observers should also observe mail-in ballot processing, known as Central Absentee Precinct (CAP).

EPEC's analysis of the Daily Absentee List (DAL) of all localities' early voting data, provided by the Department of Elections, shows that priority for observing should be given to the localities and precincts with large volumes of the following: By-Mail ballots whose processing shows them Uncountable (mail-in ballots that are issued/still out, or set aside as "unmarked"); By-mail ballots that were Unobserved during processing.

Our rankings reflect operational risk signals present in the 1 November 2026 Daily Absentee List analysis that referenced voter-list removal codes under the National Voter Registration Act (NVRA) with live mail-in ballots that were in issued status (still out) and set aside ("unmarked"). We observed ballots that were issued despite NVRA cancellation codes showing registration records as Deceased, Declared Non-Citizen, Moved Out of State, Mentally Incapacitated, and Felon. (Some felons' voting rights may be restored via the governor's office.)

This analysis provides rankings of localities with high numbers of Uncountable or Unobserved mail-in ballots.

Northern Virginia localities dominate the ranking. Fairfax County alone accounts for the largest share of Uncountable mail ballots and ranks first. The recommended allocation would place 10 locality observers at the highest-ranked central processing sites and 90 precinct observers primarily in Fairfax County and Arlington County precincts, with limited coverage in other high-volume jurisdictions.

This does not establish that any individual ballot is unlawful. The analysis only identifies locations where independent observation of material information on mail-in ballots, such as proper chain-of-custody, signature verification checks, and cure processes, would yield useful public information.

Methodology

The source file is a pivot roll-up of the Virginia Department of Elections Daily Absentee List (DAL) dated 1 November 2026 (DAL202611-01), linked by voter ID to the 10 September 2026 Registered Voter List, monthly update status reports (2023–2026), and locality political leaning. Columns treated as voter attributes include Ballot Status, Gender, NVRA Reason Code, Leaning, Congressional District, Voter Type, and Ongoing flag.

Risk scores for localities and precincts weight Uncountable Unobserved (By Mail+) volume most heavily, followed by approved applications that had NVRA-flagged removal codes, Deleted status volume, and total mail volume. Precincts with fewer than 50 approved applications were excluded from ranking. All 133 localities in Virginia are ranked; the top 88 precincts are listed for the 90-observer allocation (with the remaining two observer slots assigned to the next two localities beyond the primary 10).

Key Status Definitions

Countable Observed — primarily in-person early votes already cast.

Countable Unobserved (By Mail +) — mailed ballots received and accepted as countable after processing.

Uncountable Unobserved (By Mail+) — mailed ballots associated with approved applications but "unmarked" and uncountable (typical causes include signature, identification, or timing defects).

Deleted — DAL (early voting) record later removed.

NVRA flags — Approved applications for ballots despite maintenance records showing the following NVRA removal/cancellation codes: Declared Non-Citizen, Felon, Deceased, Moved, or Mentally Incapacitated.

Recommended Locality Observers (10 + 2)

The following 12 localities are recommended for the 10 primary locality CAP observers plus two additional slots. Rank order reflects the composite risk score.

Rank	Locality	Approved Early Vote Ballots	Uncountable Mail Ballots (Issued/Still Out or Unmarked)	# NVRA removal codes	Notes
1	FAIRFAX COUNTY	259,321	27,677	12	High uncountable mail (27,677); NVRA flags (12); High deleted (4,615)
2	LOUDOUN COUNTY	95,561	9,441	15	High uncountable mail (9,441); NVRA flags (15); High deleted (1,628)
3	PRINCE WILLIAM COUNTY	99,724	9,080	7	High uncountable mail (9,080); NVRA flags (7); High deleted (1,762)
4	VIRGINIA BEACH CITY	93,658	7,919	8	High uncountable mail (7,919); NVRA flags (8); High deleted (1,481)
5	ARLINGTON COUNTY	57,860	6,539	7	High uncountable mail (6,539); NVRA flags (7); High deleted (1,668)
6	HENRICO COUNTY	74,228	5,890	7	High uncountable mail (5,890); NVRA flags (7); High deleted (1,420)
7	CHESTERFIELD COUNTY	98,463	5,475	11	High uncountable mail (5,475); NVRA flags (11); High deleted (1,084)
8	CHESAPEAKE CITY	54,039	4,393	10	Elevated uncountable mail (4,393); NVRA flags (10)
9	RICHMOND CITY	38,996	4,048	7	Elevated uncountable mail (4,048); NVRA flags (7)
10	NORFOLK CITY	30,009	3,695	9	Elevated uncountable mail (3,695); NVRA flags (9)
11	ALEXANDRIA CITY	38,885	3,446	9	Elevated uncountable mail (3,446); NVRA flags (9)
12	NEWPORT NEWS CITY	25,773	3,147	1	Elevated uncountable mail (3,147)

Observers at these localities should focus on central absentee processing (intake, verification, cure, and tabulation areas) where the majority of uncountable and mail ballots are handled.

Recommended Precinct Observers (88)

The top 88 precincts by risk score are listed in Appendix B. Fairfax County and Arlington County account for the large majority of the highest-ranked precincts. Remaining slots are distributed across Loudoun, Prince William, Newport News, Alexandria, Norfolk, and a small number of other localities.

Precinct observers should prioritize sites with elevated Uncountable Unobserved volumes or the presence of NVRA-flagged applications. Large-volume precincts are noted where relevant.

Implications for Public Trust

Concentrating limited observer resources where mail-ballot volumes and uncountable records are highest maximizes the chance of documenting process compliance or identifying operational exceptions. Northern Virginia jurisdictions process the largest absolute numbers of uncountable mail ballots in this snapshot. Observation at those central facilities and at the highest-volume precincts provides the greatest transparency return for a 100-observer deployment.

Caveats apply. NVRA (removal) codes can lag death records or rights restorations. Coding errors occur. An approved application with a status flag does not by itself prove an unlawful ballot was cast or counted. The rankings are operational prioritization tools based on the attributes present in the public data.

Recommendations

1. Assign the 10 locality observers to the highest-ranked central absentee processing sites (Fairfax, Loudoun, Prince William, Virginia Beach, Arlington, Henrico, Chesterfield, Chesapeake, Richmond, and Norfolk).
2. Assign the two additional locality slots to Alexandria City and Newport News City.
3. Deploy the 88 precinct observers according to the rank order in Appendix B, concentrating first on Fairfax County and Arlington County precincts.
4. Document chain-of-custody, signature verification, and cure processes at both central facilities and precincts.
5. Request timely public extracts of Daily Absentee List and ballot-status files to support ongoing independent review.

About EPEC

Electoral Process Education Corporation is a Virginia 501(c)(3) nonprofit of volunteer technologists promoting voter participation and transparency in election technology through public voter-data analysis, publications, and a free research library. EPEC is non-partisan. Analysis of Virginia Department of Elections files is performed from purchased and public data; conclusions are those of the authors.

Rick Naigle — Senior Process Engineer / Analyst. West Point (Engineering), Georgia Tech (Operations Research), Lean Six Sigma Black Belt, retired Army Airborne Ranger, process and mission-assurance background.

Erin Marie Joyce — Editor, Communications Director.
